NEUROTOXIN is designed to look like the letters are breaking up or forming from pixels. It was inspired by the Xerox Corporation's former X logo, designed in 1994 by Landor Associates. The basic letterforms are modeled after a bold Didone-type font. Pairs with a nice Bodoni or even Times Roman. Version 2.0 includes an expanded character set with lowercase and improved spacing and kerning.

**Non-profit, not-for-profit, charity use:** You may use NEUROTOXIN without charge but only with the requirement that the non-profit organization sends Harold's Fonts one example of the finished item and a receipt for a \$99 product donation.

**For profit, commercial use:** You can easily arrange licensing through Font Brothers, please contact [stuart@fontbros.com](mailto:stuart@fontbros.com)
