

**Subtext**  
**Opentype font v1.5**  
**©2020 Harold Lohner**  
**All Rights Reserved**

SUBTEXT is designed to obscure your words, make them less legible, less straightforward, less obvious. Suppose you're a spy, a lawyer, or an offbeat poet. The basic letterforms are bold sans serif with a serif letter subtracted from each. As you type, a second, seemingly random character also appears. The earlier version of this font did not have lowercase; version 1.5 has an expanded character set and improved spacing and kerning

**Non-profit, not-for-profit, charity use:** You may use SUBTEXT without charge but only with the requirement that the non-profit organization sends Harold's Fonts one example of the finished item and a receipt for a \$99 product donation.

**For profit, commercial use:** You can easily arrange licensing through Font Brothers, please contact [stuart@fontbros.com](mailto:stuart@fontbros.com)
